

# Lorna Garnier

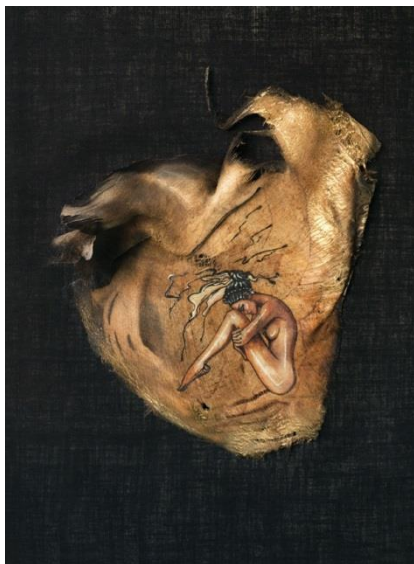

**Eco Mind** showcases the unique contemporary art of French artist Lorna Garnier, whose work, motivated by ecological global themes, teases our senses and reveals the softness and purity of our nature. Garnier's artwork acts as a bridge between modern sophistication and valuable traditions.

Garnier is a fashion and interior designer who specialises in textile fibres. Using a technique that allows her to paint onto treated coconut fibres, Garnier shapes each piece individually creating an architectural artwork that expresses different thoughts and feelings according to the angle the work is viewed from.

She has worked in Europe and Australia for hotels and restaurants installing works grounded in the natural fibres she uses to create unique decors, and her travels abroad continue to inspire her to be eco-minded in the production of her art.

The term *Terre Légère* denotes the philosophy that underpins Garnier's practice. *Terre Légère* translates as 'Light Land', a concept that gathers together themes that guide Garnier's choice of materials and subject matter. These choices all contribute to the energy of well-being and serenity her works bring to a space.

Gold thoughts, coco fiber manipulation, mixed medias, acrylic, spray paint, jute canvas, 40x30"
